

# Global Pest Management Coalition

## Join the Global Pest Management Coalition

*Protectors of Public Health*

### HOW THE COALITION WAS FORMED

The creation of the Global Pest Management Coalition came naturally after the successes of the Global Summit conferences organized in France (2015), New York (2017), and the creation of World Pest Day in Beijing (2017). Those three events underlined the potential impact of a global message and a coordinated worldwide action supported by the professionalism of our industry.

### MEMBERSHIP STRUCTURE

The Global Pest Management Coalition is made up of both trade associations and corporate organizations who are already members of regional associations, like FAOPMA, CEPA, and NPMA. For these purposes, a non-profit trade association also known as an industry trade group, business association, sector association or industry body, is an organization founded and funded by businesses that operate in a specific industry. An industry trade association may participate in public relations activities such as advertising, education, political donations, lobbying, and publishing, but its focus is collaboration between companies. Associations may offer other services, such as organizing conferences, networking or charitable events or offering classes or educational materials.

### MISSION

The mission of the Global Pest Management Coalition is to create a unified voice across the globe promoting the value of pest management in ensuring the protection of health, home, food and businesses.

### GOALS

- To promote professionalism of the pest management industry, featuring World Pest Day.
- To share knowledge and take advantage of education programs from associations around the world that could be exchanged within associations, regarding what governments actions impact the industry, and creating global responses to local crisis.
